

The following annual goals and priorities were established through public input, recommendations from the State Rehabilitation Council, VR's managing for results strategic planning, and analysis of the results of the 07-09 triennial assessment. During the joint SRC/SILC meeting in May 2006 goals and priorities were reviewed and developed for the FFY 2007 State Plan submission. In 2007 the SRC's Evaluation Committee reviewed the goals & priorities for the FFY 2008 updates and again in 2008 for the FFY 2009 submission. They supported their continuation with minor updates as necessary. The committee then shared their recommendation with the SRC.

Goal	Description	State Rehab Council	Analysis of Triennial Assessment	Public Input	NDVR Managing for Results	Federal Standards and Indicators
